

**Archives of the Maize Genetics Cooperation Newsletter and other materials**

--Coe, E

Copies of the MGCNL from 1929 to 2014 have been deposited in the archives at the University of Missouri. Whenever available these are verbatim copies; a few were personal copies of M. M. Rhoades or others. Some correspondence and historical materials accompany the Newsletters, retained as sources for historical research. Copies of Emerson's 1923 communication about nomenclature, of the "butterfly maps", and of most letters calling for Newsletter notes, are included.

The deposit is at [http://muarchives.missouri.edu/c3-19-21\\_box\\_list.html](http://muarchives.missouri.edu/c3-19-21_box_list.html) and is part of my archived files and papers.
