USDA/ARS/MWA
Urbana, IL

During the past year, we obtained positive allele tests for the following previously uncharacterized mutants: *pale-y*-85-3134-46* is a temperature sensitive pastel allele of *y1* and is now called *y1-85-3134-46*. *y*-73-6* and *y*-Williams-60-154* are allelic to *y8* and are now called *y8-73-6* and *y8-Williams-60-154* respectively.
